PROFESSIONAL SUMMARY

Full-stack web developer and MCA student with hands-on experience building scalable MERN stack applications using React.js, Node.js, Express.js, and MongoDB. Skilled in designing responsive user interfaces, secure RESTful APIs, JWT authentication systems, and production-level web applications. Active open-source contributor in GSSoC 2026 with practical exposure to collaborative Git workflows, frontend optimization, and modern software engineering practices.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, C++
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive UI Design
Backend	Node.js, Express.js, REST APIs, JWT Authentication
Databases	MongoDB, SQL
Tools	Git, GitHub, Postman, VS Code, Vercel, Netlify
Core Concepts	DSA, OOP, DBMS, Operating Systems, Computer Networks, MVC Architecture

WORK EXPERIENCE

Web Developer Intern — Infotact Solution

Remote Internship

- Developed and optimized a scalable Telemedicine and EHR platform using the MERN stack with TypeScript support.
- Engineered secure RESTful APIs with JWT authentication, Zod validation, and role-based authorization.
- Implemented intelligent appointment scheduling with conflict detection and patient-doctor workflow management.
- Improved application responsiveness and user experience across multiple screen sizes.
- Collaborated within Git-based workflows contributing feature implementations, debugging, and API integrations.

PROJECTS

Shortly — URL Shortener Platform

[Live Demo](#) | [GitHub](#)

React.js • Node.js • Express.js • MongoDB • Tailwind CSS

- Developed a scalable full-stack URL shortening platform supporting custom aliases and analytics tracking.
- Designed optimized RESTful APIs and MongoDB schemas for URL management and click analytics.
- Implemented JWT-based authentication and protected dashboard routes.
- Built a responsive modern UI with copy-to-clipboard functionality and analytics visualization.

Restaurant Management System

[Live Demo](#) | [GitHub](#)

React.js • Firebase • Node.js

- Developed a restaurant management platform supporting reservations, menu handling, and CRUD operations.
- Integrated frontend components with Firebase services and REST APIs for real-time synchronization.
- Implemented responsive dashboard layouts and optimized user interaction workflows.
- Structured reusable frontend components for scalable and maintainable architecture.

OPEN SOURCE CONTRIBUTIONS

- Active contributor in GirlScript Summer of Code (GSSoC) 2026.
- Contributed frontend bug fixes, UI responsiveness improvements, and feature enhancements.
- Worked with maintainers using GitHub workflows including pull requests, issue tracking, and collaborative debugging.

EDUCATION

Pranveer Singh Institute of Technology

Master of Computer Applications (MCA) | 2024 – 2026 | Kanpur, India

Chhatrapati Shahu Ji Maharaj University

Bachelor of Computer Applications (BCA) | 2020 – 2023 | Kanpur, India

ACHIEVEMENTS

- Qualified Flipkart GRID 5.0 Round 2 among nationwide engineering participants.
- Built and deployed multiple MERN stack and frontend applications focusing on scalable architecture.
- Practicing Data Structures & Algorithms with focus on arrays, strings, and hashing.
- Active open-source contributor with collaborative software development experience.
